

AsliJobs Documentation — Summary Report

Generated from: Current monorepo (read-only analysis)

Output root: docs/project-documentation/

Counts

Metric	Count	Notes
Frontend App Router pages	49	Public + employer + job seeker + team
Employer workspace/auth pages	28	Includes redirects / unauthorized
Job seeker pages	11	Auth + workspace
Public site pages	13	Including /login redirect
Admin routes	1	/ HomePage only
Backend mounted API modules	10	auth, employers, jobs, jobseekers, resumes, applications, saved-jobs, saved-candidates, notifications, team
Backend placeholder modules (unmounted)	8+	admin, campaigns, interviews folder, placements, subscriptions, support, users, shared
Documented API rows (workbook sample + core)	~80+	Full route inventory larger; see API doc + workbook
Database models / collections	16	Mongoose models
Frontend component TSX files under components/	~300–500	Path variants; large feature UI surface
Design system color tokens	72	@theme in globals.css

Technologies used

Frontend: Next.js 16, React 19, TypeScript, Tailwind 4, TanStack Query, Axios, RHF, Zod, Lucide, Bootstrap Icons, Inter

Backend: Express 5, Mongoose 8, JWT, Zod, Multer, Cloudinary, Resend, WhatsApp OTP (optional), exceljs, pdfkit, helmet, rate-limit

Admin: Vite 8, React 19, React Router 7, TanStack Query, Recharts, Tailwind 4

Design system summary

- Font: **Inter** (next/font/google)
- Tokens: CSS @theme in frontend/src/app/globals.css
- Primary: #0e8585 / soft #00baa5 / accent #ffd54f
- Logo: frontend/src/assets/AsliLogo.svg
- Full doc: source/AsliJobs_Design_System_Documentation.md

Folder paths of generated documents

Document	Path
Index	docs/project-documentation/source/AsliJobs_Project_Index.md
Master	docs/project-documentation/source/AsliJobs_Master_Project_Documentation.md
API	docs/project-documentation/source/AsliJobs_API_Documentation.md
Employer	docs/project-documentation/source/AsliJobs_Employer_Module_Documentation.md
Job Seeker	docs/project-documentation/source/AsliJobs_JobSeeker_Module_Documentation.md
Design System	docs/project-documentation/source/AsliJobs_Design_System_Documentation.md
Database	docs/project-documentation/source/AsliJobs_Database_Architecture.md
Summary (this file)	docs/project-documentation/source/AsliJobs_Documentation_Summary.md
Feature List	docs/project-documentation/generated/AsliJobs_Feature_List.xlsx
API List	docs/project-documentation/generated/AsliJobs_API_List.xlsx
Page List	docs/project-documentation/generated/AsliJobs_Page_List.xlsx
PDF exports (if present)	docs/project-documentation/generated/*.pdf

Important honesty notes

- Employer pages **Campaigns**, **Subscription**, and partially **Analytics/Reports** exist in the frontend; corresponding backend routers are **not mounted**.
- Admin app defines roles but has **no production feature screens** beyond a home stub.
- Interviews are **application-embedded**, not a separate Mongo collection.
- Documentation does **not** invent features beyond codebase evidence.
