

AsliJobs — Employer Module Documentation

App: frontend/ employer routes + backend/ employer-scoped APIs

Layout: employer/(workspace)/layout.tsx → EmployerDashboardLayout + EmployerAuthGuard

RBAC modules: dashboard, jobs, candidates, interviews, messages, campaigns, reports, subscription, company_profile, team_management, settings

1. Authentication & entry

Page	Route	Purpose	Auth
Employer Login	/employer/login	WhatsApp OTP login	Public
Employer Register	/employer/register	Multi-step registration + company docs	Public
Member login redirect	/employer/member-login	Redirects to /team-member/login	—
Team Member Login	/team-member/login	Email/password → workspace session	Public
Accept Invitation	/team/accept-invitation	Set password from invite token	Public
Unauthorized	/employer/unauthorized	RBAC denial UX	Session

APIs: /api/v1/employers/login/* , /api/v1/employers/register* , /api/v1/team/auth/login , invitation endpoints, /api/v1/auth/workspace/*

Client storage: aslijobs_employer_access_token , aslijobs_employer_refresh_token

2. Workspace pages

Dashboard — /employer/dashboard

Item	Detail
Purpose	Hiring overview: stats, recent jobs, funnel, notifications, profile completion
Components	EmployerDashboardHome, dashboard-home cards
APIs	Job stats, application stats, notifications, growth/funnel helpers
Permissions	dashboard.read (and related module reads for widgets)
Features	Delete job from recent list (cascade), metric cards

Jobs — /employer/jobs

Item	Detail
Purpose	Manage job posts
Components	EmployerJobsPageContent, table, filters, bulk toolbar, bulk delete modal, preview modal
APIs	GET /jobs/mine, stats, status patch, delete, bulk-delete

Permissions	jobs.read; mutations need create/update/delete
Search / filters	Title/role/location search; status tabs; advanced filters (type, salary, city, dates, ...)
Pagination	Page size options (10/20/50)
CRUD	Create via /post-job; edit active/draft; status actions; cascade delete + orphan heal

Post / Edit Job — /post-job , /post-job/[jobId] , /post-job/success

Item	Detail
Purpose	Multi-step job wizard (outside workspace chrome)
APIs	create, draft, publish, update
Permissions	jobs.create / jobs.update

Candidates — /employer/candidates , /employer/candidates/[applicationId]

Item	Detail
Purpose	Application pipeline list + detail
Components	EmployerCandidatesPageContent, list/detail panels, export modal, interview editor
APIs	/applications/employer*, shortlist, notes, status, hiring, interview
Permissions	candidates.*, interviews.* as applicable
Search / filters / sort / pagination	Yes (list params)
Export	Preview + Excel export endpoints

Saved / Shortlisted Candidates — /employer/saved-candidates

Item	Detail
Purpose	Saved candidates; shortlisted filter (applicationStatus=shortlisted)
APIs	/saved-candidates*
Features	Priority/tags/notes modals, export, stats

Interviews — /employer/interviews

Item	Detail
Purpose	Interview list, stats, calendar views
APIs	/applications/employer/interviews, interview patch/cancel
Permissions	interviews.read/create/update

Note	Data stored on Application documents
------	--------------------------------------

Messages — /employer/messages

Item	Detail
Purpose	Conversations grouped by application notifications
APIs	/notifications/me/conversations*
Permissions	messages.read

Notifications — /employer/notifications

Item	Detail
Purpose	Employer inbox
APIs	/notifications/me*

Company Profile — /employer/company-profile

Item	Detail
Purpose	View/edit company profile & media
APIs	GET/PATCH /employers/me, profile update
Permissions	company_profile.*

Team Management — /employer/team-management (+ department/member/role detail routes)

Item	Detail
Purpose	Departments, roles, members, invitations, permission matrix
APIs	/api/v1/team/*
Permissions	team_management.*
Features	Invite, resend, cancel; role archive/activate; field access

Team Member Profile — /employer/team-member/profile

Item	Detail
Purpose	Logged-in team member self profile
APIs	GET /team/members/me

Settings — /employer/settings

Item	Detail
Purpose	Settings sections (security, notifications, integrations, activity logs UI)
Permissions	settings.*

Help Center — /employer/help-center

Item	Detail
Purpose	Employer help content surface

Campaigns — /employer/campaigns

Item	Detail
Purpose	Page exists in frontend
Backend	No mounted campaigns API (placeholder module)

Analytics — /employer/analytics

Item	Detail
Purpose	Page exists in frontend
Backend	Aggregations primarily via jobs/applications stats; no dedicated analytics router

Reports — /employer/reports

Item	Detail
Purpose	Page exists in frontend
Backend	Export APIs on applications/saved-candidates; no dedicated reports router

Subscription — /employer/subscription

Item	Detail
Purpose	Page exists in frontend
Backend	No mounted subscriptions API

3. Cross-cutting employer behaviors

Concern	Implementation
Sidebar nav	EmployerSidebar + permission-aware items
Field-level RBAC	Backend masks/hides fields; client Can/permission hooks
Cascade job delete	Removes applications, saved candidates, notifications, views for that job

React Query	Feature query keys; cascade invalidation helper
-------------	---

4. Public job posting entry

Employers may also enter via marketing CTAs to `/post-job` and `/employer/register` .
