

AsliJobs — Job Seeker Module Documentation

App: frontend/ job-seeker routes + public apply flows

Workspace layout: job-seeker/(workspace)/layout.tsx → JobSeekerDashboardLayout + JobSeekerAuthGuard

Auth storage: aslijobs_jobseeker_access_token , aslijobs_jobseeker_refresh_token

1. Authentication & onboarding

Page	Route	Purpose
Login	/job-seeker/login	WhatsApp OTP login
Register	/job-seeker/register	Registration + OTP + preferences + complete
Application success	/job-seeker/application-success	Post-apply confirmation

APIs: /api/v1/jobseekers/login/* , /api/v1/jobseekers/register* , /api/v1/auth/job-seeker/*

2. Workspace pages

Dashboard — /job-seeker/dashboard

Item	Detail
Purpose	Seeker home overview
Components	DashboardHomeContent / job-seeker dashboard components
APIs	Profile, applications stats, notifications unread

Profile — /job-seeker/profile

Item	Detail
Purpose	View/edit profile, photo, preferences dialogs
APIs	GET/PATCH /jobseekers/me, photo upload/delete
Features	Profile strength UI, edit modals, sidebar

My Resume — /job-seeker/my-resume

Item	Detail
Purpose	Resume preview, regenerate, PDF
APIs	/resumes/me, regenerate, PDF
Features	Print styles (.resume-print-root)

Applied Jobs — /job-seeker/applied-jobs , /job-seeker/applied-jobs/[applicationId]

Item	Detail
Purpose	Application list + detail; withdraw
APIs	/applications/me*, withdraw
Search / filters / sort / pagination	Yes (AppliedJobs filters panel/sidebar)

Saved Jobs — /job-seeker/saved-jobs

Item	Detail
Purpose	Bookmarked jobs
APIs	/saved-jobs/me*
Features	Stats, ids, sort/select, unsave

Notifications — /job-seeker/notifications

Item	Detail
Purpose	Seeker inbox
APIs	/notifications/me*

Settings — /job-seeker/settings

Item	Detail
Purpose	Seeker settings surface

3. Public discovery & apply (shared with public site)

Page	Route	Purpose
Find jobs	/jobs	Search, filters, pagination, mobile sheets
Job detail	/jobs/[jobId]	Public job; apply CTA when authenticated
Home	/	Landing hero, categories, resources, employer carousel

APIs: GET /jobs/public* , POST /applications/apply (auth), saved-jobs for bookmarking

Optional job seeker JWT on public job routes enables applied-state awareness (optionalJobSeekerAuth).

4. Workflows

Registration

Register → OTP → Preferences → Complete → Login/session

Apply

Browse/search → Job detail → Apply (requires resume) → Application success → Track in Applied Jobs

Withdraw

Applied job detail → Withdraw (when status allows)

Save job

Job card/detail → Save → Manage in Saved Jobs

5. What is not a separate seeker page

Concept	Where it lives
Messages	No dedicated seeker messages page; notifications inbox covers alerts
Career documents beyond resume	Resume module + profile fields
Companies directory page	No /companies page; employer logos on home carousel

6. Navigation chrome

Component	Role
JobSeekerSidebar	Workspace nav + logo
JobSeekerTopBar	Top bar
FloatingBottomNav	Mobile nav (public + authenticated items)
Site Navbar	Public header with seeker login/register CTAs
